# Inukshuk

are stone monuments erected in the image of humans. One of their purposes was to communicate direction in the harsh and desolate Arctic.

To build an Inukshuk you must find the perfect balance for each rock. No one rock is more important than another, and each creation is unique. A well-built Inukshuk can withstand the harshest conditions for centuries.

**At Sectoral, we believe that portfolios must be built with the same principles of balance, quality, and durability.**
